Oops, I made a mistake. No DDx for bird egg assessment...it is dioxin/furan. Sorry about that!

Bob and Jim – here are the updated PRGs that we have so far. I wanted to send these to you so that you can see most of the changes. The ones highlighted yellow are still being evaluated, so hopefully we can update those on Monday. We are still exploring the human health PRG for cPAH. We are also calculating PCB and DDx PRGs for the bird egg assessment (both Eagle and Osprey). We don't know yet if it will affect the selected PRG. We also have to reconsider the spatial scales for the PRGs – again, I hope that we will have something to provide you on Monday.

Have a great weekend!
